## **Abstract**

This is the abstract.

It consists of two paragraphs.

**Keywords:** key; dictionary; word

## **1 Introduction**

This template is based on the generic OUP template available [here](#). The original OUP sample tex document, providing more details on preferred formatting for LaTeX docu-

---

\*Corresponding author; Email: bob@example.com

ments, is included with the template in the file `ouparticle_sample.tex`.

Here are two sample references: Feynman and Vernon Jr. (1963; Dirac 1953). Bibliography will appear at the end of the document.

## 2 Materials and methods

An equation with a label for cross-referencing:

$$\int_0^{r_2} F(r, \varphi) dr d\varphi = [\sigma r_2 / (2\mu_0)] \int_0^\infty \exp(-\lambda |z_j - z_i|) \lambda^{-1} J_1(\lambda r_2) J_0(\lambda r_i) \lambda d\lambda \quad (1)$$

This equation can be referenced as follows: Eq. 1

### 2.1 A subsection

A numbered list:

- 1) First point
- 2) Second point
  - Subpoint

A bullet list:

- First point
- Second point

## 3 Results

### 3.1 Generate a figure.

```
plot(1:10,main="Some data",xlab="Distance (cm)",ylab="Time (hours)")
```

You can reference this figure as follows: Fig. 1.

```
plot(1:5,pch=19,main="Some data",xlab="Distance (cm)",ylab="Time (hours)")
```

Reference to second figure: Fig. 2

### 3.2 Generate a table using xtable

### Some data

Figure 1: This is the first figure.

### Some data

Figure 2: This is the second figure.

```
df = data.frame(ID=1:3,code=letters[1:3])

# Creates tables that follow OUP guidelines using xtable
library(xtable)
print(xtable(df,caption="This is the table caption",label="tab:tab1"),
      comment=FALSE)
```

	ID	code
1	1	a
2	2	b
3	3	c

Table 1: This is the table caption

You can reference this table as follows: Table 1.

### 3.3 Generate a table using kable

```
df = data.frame(ID=1:3,code=letters[1:3])

# kable can also be used for creating tables
knitr::kable(df,caption="This is the table caption",format="latex",
             booktabs=TRUE,label="tab2")
```

You can reference this table as follows: Table 2.

## 4 Discussion

You can cross-reference sections and subsections as follows: Section 2 and Section 2.1.

**Note:** the last section in the document will be used as the section title for the bibliography.

Table 2: This is the table caption

ID	code
1	a
2	b
3	c
